

The Performance Marketplace

www.performancemarketplace.com

- Proven: Used on thousands in a variety of applications and by many of the top police agencies in America.
- Tough: No other device comes close.
- Most economical service plan: \$19.95 / month includes everything.
- Fully featured alarm system: Multiple built in sensors can be selected and customized to fit your application.
- The most notification options: Others offer email and text but only MOBILELOCK gives you the choice of phone call notification with an automated voice and the ability to transmit to a central station.
- Ability to text commands to your devices: You are often not near a computer and it can be clumsy pulling up a website from your phone. MOBILELOCK is the only device that allows you to text simple commands like Arm, Disarm, Locate, Status and Page straight to your device. No need to sign into an account. Our system uses your mobile phone number to find your account.
- Only device with a built in siren: Receive an audible confirmation when you text "Arm" or Disarm" to your device or have the siren sound on alarm if you choose. If you track your stolen trailer back to a garage there is little the police can do...but, if you remotely set off the page feature in your MOBILELOCK they can issue a warrant to enter the property and the arrest can be made.
- Best GPS Locator: Unlike most of the GPS locators on the market, MOBILELOCK uses cellular assisted GPS which provides locates indoors and even in the most obstructed areas. Most other GPS locators and trackers require line of sight to the sky. This is why the police prefer MOBILELOCK.
